

# Savings calculation

## Specifications

Each employee has a fixed salary, and calculating the savings can be tricky especially because there are many parameters that must be taken in consideration : the age of the employee, the percentage of savings from salary, and the percentage of raise of salary each year.

## Goals

1. **Calculate the accumulated amount from saving**
2. **Calculate the number of years needed to have a certain amount**
3. **The number of years that can assure a good living from the saved amount**
